Agentic AI Foundation Welcomes 52 New Members, Gaining Major Financial Services Players and APAC Leaders

Alibaba, Visa, and Wells Fargo join as Gold Members as demand for open agentic AI infrastructure accelerates globally

Summary

- The Agentic AI Foundation (AAIF) grows to 242 member organizations with the addition of 52 new members over the past three months across Gold, Silver and Associate tiers.
- New members include leading financial institutions, enterprise software companies, research organizations, and APAC technology leaders, reflecting rising global demand for open agentic AI standards.
- Momentum builds across the Asia-Pacific region with MCP Dev Summit Seoul followed by AGNTCon + MCPCon Japan and China this September, bringing organizations together to advance interoperable, open source agentic AI infrastructure.

SEOUL, South Korea, Aug. 13, 2026 — MCP Dev Summit Seoul — [The Agentic AI Foundation](#) (AAIF), the neutral home where the open standard agentic AI stack is being built, today announced 52 new member organizations over the past quarter. The influx - comprising 3 Gold, 29 Silver, and 20 Associate Members - brings total foundation membership to 242 organizations worldwide.

The AAIF's recently released [Agentic AI Momentum Report](#), which tracks 116 open source projects across five layers of the agentic AI stack, shows that open source agentic AI has evolved into a mature, densely connected ecosystem. Continuous participation from new members – including financial institutions, enterprise platforms, and international leaders – reinforces the demand for robust, secure, and interoperable agentic AI infrastructure as organizations standardize how agents interact, especially across compliance-critical domains like payments, banking, and supply chain management.

“Top financial institutions like Visa and Wells Fargo, alongside major APAC technology leaders like Alibaba, recognize that building agents at scale requires neutral infrastructure they can depend on,” said Mazin Gilbert, Executive Director of the Agentic AI Foundation. “By bringing these organizations together under a neutral foundation and creating opportunities to collaborate at events like MCP Dev Summit Seoul, we're helping build the open standards that will enable the Internet of Agents.”

At MCP Dev Summit Seoul, the AAIF is highlighting rapid developer and enterprise momentum across the Asia-Pacific region. In addition to new Gold Member Alibaba, participation from prominent regional leaders including NHN KCP, Coocon, Galaxia Moneytree, and South Korea's Electronics and Telecommunications Research Institute (ETRI), reinforces APAC's influential role in advancing open, interoperable standards for agentic AI.

New Gold Members

Embargo until August 13 at 9 a.m. KST / August 12 at 8 p.m. ET

The following organizations have recently joined the AAIF as Gold Members:

1. [Alibaba Group](#) [placeholder: company description]
2. [Visa](#) [placeholder: company description]
3. [Wells Fargo](#) [placeholder: company description]

New Silver Members include Action State Group, AgentCat, Asana, AuthPlane, Boomi, Bread Financial, Buoyant, Causely, CData Software, Coocon, Datavant, FusionAuth, Galaxia Moneytree, Gierd, Guild AI, iTmethods, NHN KCP, NexaScience, OPAQUE Systems, Postman, Pulumi, Sapiom, SerpApi, Silver Lake, Speakeasy, Tigera, Traefik Labs, Xerg, and Zafin Labs Americas.

New Associate Members include Astron SkillHub, Cable Television Laboratories, Center for Democracy & Technology, Commerce Operations Foundation, Concordia University, Electronics and Telecommunications Research Institute, Georgia Tech Applied Research Corporation, Lancaster University, L'Autre Intelligence & Nous, MR Kloud Foundation, Queen Arwa University, Sage Bionetworks, Soundboard, Stanford University, Technology For Development Nepal, THE GEOSTRATA, The European Organization for Nuclear Research (CERN), The Mifos Initiative, and UnGovr.

By joining the AAIF, new members gain access to a global ecosystem where they can directly shape emerging standards, collaborate on open source innovation, and help meet growing demand for interoperable, standardized agentic infrastructure. For information on becoming a member, visit our [website](#).

New and existing AAIF members will gather in Seoul at MCP Dev Summit from August 13-14. View the agenda and register to attend [here](#).

About the Agentic AI Foundation

The Agentic AI Foundation (AAIF) is the neutral home where the open standard agentic AI stack is being built. With founding projects including MCP, goose, AGENTS.md, and agentgateway, AAIF governs the core standards and protocols that enable agents to operate interoperably across platforms. Through transparent governance and broad industry participation, AAIF is
